

AILA CRM Feature Lists

Two separate catalogs:

Full CRM feature list — complete mature-CRM catalog (long-term).

Ready-to-sale CRM feature list — minimum to sell and run a sales team.

1. Full CRM feature list

Complete catalog of what a mature CRM can include. Not all items are required to sell.

Core objects

- Contacts / people
- Companies / accounts
- Deals / opportunities
- Activities (notes, calls, emails, meetings)
- Tasks / to-dos
- Pipelines & stages
- Products / price books / line items
- Quotes / proposals
- Invoices / payments (some CRMs)
- Custom fields
- Custom objects
- Tags, lists, segments
- Attachments / files
- Record relationships & hierarchies

Contacts & leads

- Create / read / update / delete contacts
- Bulk import / export
- Lead capture forms
- Business card / PDF / scan capture
- Deduplication & merge
- Lead status / lifecycle
- Lead owner & assignment rules

- Round-robin / queues
- Lead scoring
- Enrichment
- Industry / firmographic classification
- Source & campaign tracking
- Duplicate detection on create

Companies / accounts

- Company profiles
- Parent / child accounts
- Multiple contacts per company
- Account ownership
- Account health / tiering
- Company timeline
- Territory assignment

Pipeline & revenue

- Multiple pipelines
- Custom stages & probabilities
- Deal amount, currency, close date
- Deal owners & teams
- Won / lost reasons
- Forecast categories
- Weighted forecasting
- Stage history / audit
- Kanban, list, table views
- Deal rotting / stale alerts

Activities & productivity

- Activity timeline
- Notes, calls, meetings, emails
- Tasks with due dates, priority, reminders
- Recurring tasks
- Calendar sync
- Meeting scheduler / booking links
- Click-to-call / softphone

- SMS / WhatsApp messaging
- @mentions & internal comments

Email & marketing

- 2-way email sync (Gmail / Outlook)
- Send from CRM
- Open / click tracking
- Templates
- Sequences / cadences
- Bulk email / campaigns
- Landing pages / forms
- Marketing automation
- Unsubscribe & consent management

Collaboration & access

- Multi-user workspaces
- Roles & permissions (fine-grained)
- Record-level sharing rules
- Teams / territories
- Notifications & feeds
- Audit log
- Approval workflows

Search, views & analytics

- Global search
- Advanced filters
- Saved views
- Dashboards
- Standard & custom reports
- Scheduled reports
- Funnel / conversion analytics
- Cohort / retention reports
- Forecasting dashboards
- Export / BI connectors

AI (full set)

- Capture / OCR / vision extract
- Enrichment & classification
- Email drafting
- Meeting / call summarization
- Lead / deal scoring
- Next-best-action
- Forecasting assist
- Chat assistant over CRM data
- Prompted reports
- Autofill fields
- Conversation intelligence

Integrations & platform

- Native CRM syncs (HubSpot, Salesforce, etc.)
- Calendar / mail
- Enrichment vendors
- Telephony
- Webhooks
- Public REST / GraphQL API
- Zapier / Make
- App marketplace
- Sandbox / environments

Mobile & field

- Responsive web
- Native iOS / Android
- Offline mode
- Offline capture queue
- Event / badge / card scanning
- GPS / check-in (optional)

Admin, security & compliance

- SSO / SAML / SCIM
- MFA / 2FA
- Encryption, backups
- Data residency

- GDPR tools (export / delete)
- Retention policies
- IP allowlists
- DLP / field encryption
- Status page / SLA

Billing & go-to-market product

- Plans & seats
 - Usage metering (AI, email, storage)
 - Trials, invoices, portal
 - Admin usage analytics
 - Documentation & support
-

2. Ready-to-sale CRM feature list

What you need so a customer can **buy, onboard, and run sales** without custom build-out per client.

A. Must-have product (customer can work)

Contacts

- List + detail
- Create / edit
- Owner + status
- Source (import / scan / manual)
- Import + scan capture
- Enrich + classify
- Basic dedupe

Companies

- Create / list / detail
- Link contacts (auto when possible)
- Search

Pipeline

- One default pipeline + stages
- Deals with value, owner, dates, contact/company
- Kanban + list

- Move stages
- Won / lost

Follow-up

- Notes
- Log call / meeting
- Tasks (due date, assignee, related record)
- My due / overdue
- Timeline on contact & deal

Team

- Workspace / org
- Assign owners
- My leads / deals / tasks filters
- Admin vs Member

Home dashboard

- New leads
- Open pipeline value
- Tasks due + overdue

Integrations (minimum)

- At least one outbound sync or reliable CSV export
- Keep HubSpot / Brevo if already available

AI (sellable differentiator)

- Capture AI (extract / enrich / classify)
- Follow-up email draft
- Lead brief (optional but strong)
- CRM assistant chatbot — ask questions, prompted reports, record lookup / information on prompt

B. Must-have to actually sell (business)

- Clear pricing plans (e.g. Capture / Sales / Growth)
- Trial or freemium path
- In-app billing / seat management
- Invite teammates
- Onboarding empty states + basics docs
- Support channel (email is enough at start)

- Privacy / terms
- Auth that works on your domain
- Basic reliability (prod deploy, backups)

C. Explicitly not required for ready-to-sale v1

- Full marketing automation
- Multiple custom pipelines / custom objects
- Native mobile apps
- SSO / SCIM
- Advanced forecasting BI
- Telephony / conversation intelligence
- Marketplace / public API (later)
- Autonomous agents that write/delete CRM data in bulk

Ready-to-sale success bar

A paying team can:

Invite teammates

Capture or import leads

Own contacts and link companies

Create and move deals in a pipeline

Log notes and set follow-up tasks

Use AI email draft + ask the assistant for a report

See a home dashboard

Sync or export data

Pay for seats

That is the sellable CRM. The **Full CRM feature list** above is the long-term catalog.

Related: Sales-usable MVP (subset of ready-to-sale)

Focused first engineering slice toward ready-to-sale:

Contacts upgrade (owner, status, source, manual create)

Companies

Simple pipeline (one pipeline, Kanban + list)

Activities & tasks + timelines

Team basics (owners, My filters, Admin/Member)

Home dashboard

Keep capture moat (import + scan)

Keep existing sync (no new CRMs)

Light AI (email draft, optional brief)

AI CRM assistant (chat, prompted reports, info on prompt)

Out of MVP: sequences, Gmail sync, custom fields/pipelines, heavy BI, native apps, SSO, new CRM connectors.
